SEAN HENNING

Senior Site Reliability Engineer | Principal DevOps Engineer | Cloud & Platform Architect

Utrecht, Nederland · E-mail · WEB · LinkedIn

PROFESSIONAL PROFILE

Senior technology professional specialising in Site Reliability Engineering, virtualisation architecture, DevOps, cloud infrastructure, automation, and IT security. Experienced in designing resilient enterprise platforms across virtualised, hybrid, and cloud environments. Combines hands-on engineering with infrastructure architecture, technical leadership, consultancy, and mentoring, with an emphasis on performance, security, availability, and operational efficiency.

CORE COMPETENCIES

- **Virtualisation & Architecture:** Microsoft Hyper-V architecture, virtual machine design, virtual infrastructure consolidation, VMware administration, capacity planning, high availability, and disaster recovery.
- **Cloud & Systems:** Microsoft Azure, AWS, Windows Server, Windows 11, Linux, hybrid infrastructure, and systems modernisation.
- **DevOps & Automation:** Kubernetes, Docker, Helm, Terraform, Ansible, Puppet, Jenkins, GitLab CI/CD, and Azure DevOps.
- **SRE & Monitoring:** Prometheus, Grafana, Elasticsearch, Kibana, Nagios, observability, operational readiness, and incident management.
- **Security & Networking:** Cloudflare, HashiCorp Vault, Aqua Trivy, firewalls, IAM, SSL/TLS, network security, backup, and recovery.
- **Development & Data:** Python, Bash, PowerShell, SQL, JavaScript, PHP, Go, PostgreSQL, MySQL, and MongoDB.

PROFESSIONAL EXPERIENCE

Capgemini — Senior Site Reliability Engineer
Utrecht, Netherlands | March 2025–Present

- Support secure government platforms through operational transitions, ITIL-aligned processes, chain testing, and production-readiness activities.
- Contribute to Kubernetes, Helm, Docker, and GitLab CI/CD automation, security controls, and fault-tolerant platform design.
- Apply VMware administration and virtual infrastructure management skills to support reliable enterprise operations, where applicable to the assigned environment.
- Mentor cross-functional teams and promote automation, operational consistency, and continuous improvement.

Hexaware — Principal DevOps Engineer
Cape Town, South Africa | January 2022–February 2025

- Designed CI/CD and Infrastructure as Code solutions for new and existing environments across Azure and AWS.
- Integrated Kubernetes, Jenkins, Terraform, Docker, Helm, monitoring, and security practices into automated delivery workflows.

Lightsail Education — Senior DevOps Engineer / Infrastructure Manager
Cape Town, South Africa | April–December 2021

- Automated deployments and managed containerised applications on bare-metal Kubernetes infrastructure, with cloud deployment options.
- Developed delivery pipelines, configuration management practices, technical documentation, and training.

Yellowtail — DevOps Engineer / Senior DevOps Engineer
Cape Town, South Africa | April 2019–April 2021

- Built and maintained Azure-focused Kubernetes and CI/CD environments using Jenkins, Ansible, Azure DevOps, and Bitbucket Pipelines.
- Improved deployment consistency, monitoring, and infrastructure automation.

LivingTech — IT Infrastructure Manager
Cape Town, South Africa | November 2014–June 2015

- Led infrastructure redesign and virtualisation initiatives, with a focus on Microsoft Hyper-V architecture, server consolidation, virtual machine provisioning, and migration from physical systems.
- Supported migrations to Windows Server 2012 R2 and Exchange 2013, alongside cloud infrastructure modernisation.
- Redesigned and secured client LAN/WAN environments, VPNs, firewalls, Linux services, and Windows infrastructure.
- Coordinated a team of up to ten and contributed to technical solution design, procurement, and supplier negotiations.

Earlier Career | 2001–2019
Infrastructure architecture, VMware virtualisation, systems administration, software development, security consultancy, IT management, and technical training across Huawei, Clicks Group, Mindpearl, Adnetra, and other organisations.

TECHNICAL SKILLS

- **Virtualisation:** Microsoft Hyper-V, VMware vSphere/ESXi, virtual machine lifecycle management, infrastructure consolidation, high availability, and disaster recovery.
- **Operating Systems:** Windows 11, Windows 10, Windows Server 2025/2022/2019/2016/2012 R2, Linux (Red Hat, Ubuntu, Debian, CentOS).
- **Cloud & Containers:** Azure, AWS, Kubernetes, Docker, Helm, Terraform, Ansible, Jenkins, GitLab CI/CD.
- **Monitoring & Security:** Prometheus, Grafana, Elasticsearch, Kibana, Nagios, Cloudflare, HashiCorp Vault, Aqua Trivy, networking, IAM, SSL/TLS.
- **Scripting & Data:** PowerShell, Bash, Python, SQL, JavaScript, PHP, Go, PostgreSQL, MySQL, MongoDB.

EDUCATION & CERTIFICATIONS

- CompTIA A+ and Network+ — 2004–2005
- MCP and MCSE 2000 — 2000
- Sports Management Diploma, Allenby Campus (Damelin College) — 1999
- High School Diploma with University Exemption, Jeppe High School for Boys — 1996–1998
